

Francesco Spata

Full Stack Engineer

I am currently pursuing my career as a software developer, thanks to the specialized training received through the progetto CODE and Codecademy. This path has prepared me for a professional role in this sector after obtaining a Bachelor's degree in Political Science, a significant milestone achieved following several years of work experience in other fields. In the future, I aspire to continue developing my skills in Web Development and explore new opportunities that allow me to grow both professionally and personally.
